Description: A website where customers can sign-up, login to plan trips by browsing through hotels, tourist attractions, make reservations for their trips and rate places which they visit

Core Features

- **Landing Page:** Page which the user sees after logging in and they can see suggestions for trips, discounts offered and an option to search for a place
- **User Profiles:** After signing up, the user gets to create their profile and add information about themselves, along with their picture and interests
- **Trip Scheduling Page:** A planner for the user to create their itinerary for a trip with the places they plan on visiting and their place of stay
- **Trending Page:** A trending page which showcases the trips which are most traveled, upcoming trips and location-based trips around
- **User Review:** Users can upvote and write a review for a particular trip they have visited
- **Alerts:** Notifications for users for booking confirmation, reminders, etc.

Extra Features

- **Payment Gateway**: A payment gateway interface for the user to pay for the trip
- **Travel Blogs:** Travel-related upcoming trips or blogs for users to discover
- **Video Shorts/Vlogs:** Users can upload vlogs of different places they visit and see vlogs of other users which are shared by them
- **Chatbot:** An option for the user to get queries answered quickly through a Chatbot rather than traversing a website
- **Premium:** Users can sign up for Premium which would offer them additional discounts. Users can also bundle up multiple trips and get a better discount for the overall trip
